Pupil Transportation Safety Institute (PTSI) Elmira Heights CSD Child Safety Zone Study

Summary of Project

The Pupil Transportation Safety Institute (PTSI) welcomes the opportunity to serve the Elmira Heights Central School District through the delivery of a Child Safety Zone Study to determine the eligibility of state aid for transporting children living within the designated walking distance. On a parallel project, a Comprehensive Transportation Study will be performed with the goal of expanding district owned facilities and improving efficiency of their overall transportation operation. These two studies will be performed simultaneously and the recommendations for each study will be made with consideration of all findings.

Scope of Services

PTSI will travel to Elmira Heights CSD and meet with all stakeholders to discuss any specific concerns held for a Child Safety Zone determination. Using the NY State Education Department Guidelines for Safe Zone Determination, the following will be assessed:

- Most direct student walking paths to school building from surrounding residential areas
 - Identification of all hazards to student safety while walking to school
- Highways without sidewalks or Inadequate shoulders
- Highway intersections
 - The number of intersections and the impact on traffic characteristics
- Traffic controls at intersections
- Highway intersections with RR Crossings
 - Including the number of tracks at each location
- Speed limits
- Type of traffic and volume during periods students would be walking to and from school

Methodology

Two PTSI Senior Operations Consultants will spend approximately 2-3 days on-site in district to meet with the Elmira Heights Central School District leadership and all stakeholders within the Transportation Department, as well as any other related parties, agencies or entities as requested by the consultant. The purpose of these meetings will be to determine specifics of policy, procedure and process in the transportation department regarding the establishment of Child Safety Zones. The collection of data, documentation and anecdotal information will culminate in a thorough assessment of all aspects under review to determine the viability of establishing Child Safety Zones, and affiliated costs.

The PTSI consultants will then provide the findings and recommendations in a full report which will be provided in draft form electronically for the Elmira Heights Central School District leadership review to determine any unintended political insensitivity of the document, without making changes to substance. PTSI will then finalize the report and again provide the final

document electronically, followed up by 3 physical copies which will be shipped to the school district. At the request of Elmira Heights Central School District leadership, the PTSI Consultants will return and present the report findings at a Board of Education meeting at a location and time to be determined by the district.

Project Timeline

Work will begin on this study within 15 days after district approval, as agreed upon by all parties. The final report will be delivered within 60 days of the stakeholder meeting in Elmira CSD.

Project Cost - \$8,400

The Pupil Transportation Safety Institute will provide all the services described within this proposal for a fee of \$8,400 which includes all expenses.

Any work requested beyond the identified scope of this project will be invoiced at a rate of \$1,150 per day including all expenses.

Pupil Transportation Safety Institute (PTSI) Qualifications and Expertise

PTSI – Organizational Overview

PTSI is a 501c (3) not-for-profit educational organization focused on promoting pupil transportation safety and efficiency. The company serves the pupil transportation industry in North America and Canada as a resource for federal agencies, State Education Departments, Departments of Motor Vehicles, Departments of Transportation, school districts, contractors, supervisors, managers, school bus drivers and attendants, students, and parents. The organization supports the work of school transporters by providing safety training materials and manuals, programs, evaluative and efficiency studies, trainers, instructors, speakers and consultants, and offering a wide variety of products and curriculums in its Resource Catalog. Current PTSI staff has been developing training curriculums and providing consultant services for more than 25 years.

PTSI – Consulting Experience

PTSI has provided consulting service to school districts and school bus contractors in New York State and across the country, for more than 15 years. Our consulting staff touts collectively more than 100 years of experience in transportation operations and fleet management in New York State reflecting a variety of demographics ranging from urban to suburban, small to big 5 city. PTSI consultants specialize in and provide studies in the following areas:

- Transportation Operations Compliance and Efficiency
- Transportation Budget Development and Management
- Transportation Routing Efficiency

- Special Needs Transportation Compliance
- Transportation Fleet Management and Efficiency
- Transportation Student Behavior Management

PTSI – Administrative Structure

Organizational Leadership

- **Kathleen Furneaux**, PTSI Training & Consultations Manager (Project Lead)

Consultant Team

- **William Harvey**
- **Elizabeth Hughes**
- **James Minihan**
- **Scott Goble**
- **Peter Lawrence**
- **Joseph LaMarca**

Curriculum Development

- **Maria Carocci**, PTSI Curriculum Development Specialist
- **Debra Sisson**, PTSI Curriculum Development Specialist
- **Kathleen Furneaux**, Training & Consultations Manager

Photography, Graphic Design and Print Flow –

- **Chasity Neivel**, PTSI Graphic Designer

Editing & Proofreading

- *Michele Cooper*, Writing and Edit Service

Finances (Quarterly Billing, Accounts Payables)

- **Heather Snyder**, PTSI Finance Specialist

Support Staff

- **Open Position** – PTSI Sales & Customer Support Specialist
- **Lorraine Sanders** – PTSI Course Registrar

PTSI Board of Directors - Officers

- **President: Nikki Hughes, California**
- **Vice President: Ron Kinney, California**
- **Treasurer: Jaime Gallego, Texas**
- **Secretary: Kanoe Cockett, Colorado**

PTSI Board of Directors - Directors

- **Kay Strand, Illinois**
- **Jeff Grabowski, New York**

EXPERIENCE

Hilton Central School District; Hilton, New York 2014 - Present <ul style="list-style-type: none">• Director of Transportation • Supervise a staff of 111 to safely and efficiently transport 4875 students to and from school each day. Our district is 74 square miles, we service five (5) in-district schools and 52 out of district, special needs, and private/parochial schools. We utilize a two (2) and three (3) tier routing system to maximize efficiency. We transport on 76 assigned route buses that service 329 am, midday, and pm routes. I have created and maintain an ongoing training and staff development program called the building blocks of safety to insure our staff has the latest and best information to safely transport students. Recruitment efforts of school bus drivers and attendants is an ongoing and challenging effort by our department. I oversee and maintain all staff evaluations and approve all payroll. I prepare and maintain the department budget using a zero based budget system working with multiple year figures to create an accurate and efficient budget proposal. I have created and maintained an excellent working relationship with our current union, as a part of the labor/management committee we work together to solve issues at the lowest levels and maintain an excellent working environment. Only 2 grievances in 7 years, both to do with procedural issues in the contract. I have been a part of the negotiating committees on several contracts over my 36 years in the transportation industry. I have spent most of my career building relationships with staff, union, management, administration, parents and students. All efforts to facilitate the most important goal of transporting students safely. A leader can only accomplish this by knowing their staff and appreciating their efforts, your staff needs to know what you stand for and that you support them. I have extensive experience with computerized routing systems, fleet maintenance systems, payroll, budget, staff development, safety, and training, as well as preparing reports for our Board of Education meetings.	July
---	-------------

Greece Central School District, Rochester New York
January 2014

January 2013 –

• **Director of Transportation** • Was tasked with taking a department of 450 staff and building a common respect and understanding of the department while building an excellent management support staff. I created a plan that was adopted by the administration and the School Board. In 6 months I was able to restore relationships and build a mutual respect for all within the department. This was accomplished by building networks of communication, much needed staff development, good listening skills, genuine respect that was shared with all staff. Also I was able to communicate to administration exactly what our department does and why it was important to acknowledge the department's hard work and efforts. Building trust and appreciation for both sides was critical to build new relationships. I created and implemented new student conduct procedures to close the circle of communications between school administrators and transportation department. Transportation management staff as well as drivers and attendants needed to know what steps were taken and that the students were being held accountable.

Brockport Central School District, Brockport New York
December 2013

December 1991 –

• **Driver Trainer / Safety Coordinator and Director of Transportation**
Charged with evaluating current status of training program and Article 19A files. After streamlining and improving department procedures I was given the task of evaluating routing software and making a recommendation to administration. After successfully implementing many department policy and procedures with the help of stakeholders within the department, I was asked to lead the department upon the retirement of the current Director in May 1992. In 1994 I was tasked by the School Board to look into the feasibility of mandating seat belts on school buses. I led a committee that convened weekly for 8 months and produced a manual of findings that was reviewed by the School Board by which they made their decision. I was also tasked with streamlining routes and developing programs to attract transportation staff and a retention program. I recruited high quality drivers and attendants to serve on our newly formed "Friendship Committee", this committee was charged with promoting the department by holding events that allowed team building thus gaining a better understanding of the diverse backgrounds of our peers. It was great success and helped with our new safety slogan that I have repeatedly used over my career, "Patience, Tolerance, and Understanding". I also gained an understanding and knowledge of the importance of training and staff development. I created a management trainee program that was used within the department to fill key positions as other positions were promoted from within. Many of my staff have gone on to be Directors in other school districts.

Golden Arrow / National School Bus Service, Rochester New York
1991

August 1985 - December

• **Driver / Driver Trainer / Dispatcher / Operations Supervisor / Assistant Manager / Branch manager**
As a stand by driver I spent a great deal of time in close contact with operations and dispatch. I was able to understand a quickly pick up operational procedures and processes which gave me opportunities for advancement. I was a sponge for all operational, safety, and training information which propelled me to multiple advancements within the company. When our retirement and health benefits were drastically reduced, I made a decision to secure a position with an area school district.

Other Professional Organizations:

Rochester Area Transportation Supervisors Association, served as Vice-President and President. Member of New York State Association for Pupil Transportation, Member of National Association for Pupil Transportation, I am a nationally certified Director of Transportation. NYS SBDI and MI for the NYS Education Department, and have a long history of teaching with Pupil Transportation Safety Institute, I also help teach Master Instructors, teach prospective Master Instructor candidates regarding curriculum building and lesson plans.
